

RFID & IoT in the Nordics 2019

May 23rd 2019
in Copenhagen

International User Conference and Exhibition - *learn from visionary First Movers in RFID & IoT.*

The Event is our 9th consecutive annual conference and again in 2019 at the IT University in Copenhagen.

Smart Tracking and Tracing technologies (**Wireless Identification** including RFID, WiFi, Bluetooth, NFC, ZigBee, LoRanet) is already used to increase revenue, reduce waste/fraud, and to create new Business opportunities across Industries. Providing transparency enabling your Organization to make better decisions – to be **an Intelligent Enterprise**.

While the phrase **Internet of Things** (IoT) often evokes images of ‘smart’ homes and interconnected ‘smart’ cars, the IoT presents a much broader range of new and compelling business applications across a variety of industries.

IoT reaches out to touch **Any Thing, Anywhere** – it’s not just about connecting devices to the Internet. It’s about how Everyday Things are becoming a part of a connected world.

Organizations who already achieve benefits today from Wireless Identification and IoT, will share their experiences.

As a part of the RFID & IoT in the Nordics 2019 Conference, major manufacturers and resellers will be represented at the Exhibition. This is a unique opportunity to go exploring at the large exhibition, where the vendors will be ready to explain and demonstrate their products as well as answering your questions regarding the technologies, how to get started etc.

Join us at the Conference and Exhibition and learn much more about it.

Reserve the date: May 23rd 2019.

From the 2018 Conference at the IT University in Copenhagen.
